

## ***Comcast System Improvements & Channel Realignments Planned for Mid-August***

Comcast is investing and improving its cable network to bring you more High Definition and On Demand content, faster Internet and advanced interactive services. To engineer more services, Comcast must realign certain channels, including your local Public, Education & Government (PEG) access channels. Look for a new channel lineup card which will be sent to your home, along with a sheet of frequently asked questions. These channel changes will not affect the price of programming services. All customers will receive notices detailing the channel placement changes, but we wanted to highlight the new channel numbers for the Public, Education and Government (PEG) access channels for your convenience.

Beginning August 18, 2010, Rochester Hills residents will view the community's PEG channels on:

Channel 17: Rochester Government  
Channel 18- Public Access  
Channel 19- Rochester Education  
Channel 20- Rochester Hills Government

Comcast has voluntarily added Channel 17, a Government channel from Rochester.

These channels will remain on the basic tier of service and will not require a cable box or other equipment to view with an A-cable direct connection. These new channel numbers are one of the final steps in converting the dual cable system into a technologically advanced single cable plant.
