## **Harvest Gold® Linden (*Tilia cordata x mongolica*)**

Origin: Jeffries Nurseries (Manitoba), hybrid of Littleleaf Linden & Mongolian Linden

Mature Size: Large (>45' tall)

Description: Harvest Gold® linden has a moderate growth rate and a relatively upright form as a young tree, becoming rounded with age. It does not have any serious disease or pest problems, but gypsy moth caterpillars and Japanese beetles will sometimes feed on the foliage. The leaves are resistant to mites and fungal leaf spot. Harvest Gold® linden has greater tolerance to cold and better fall color (usually yellow) than many of the other lindens currently available. Flowers and seeds are produced in smaller amounts than most other lindens.
