### **Hedge Maple (*Acer campestre*)**

Origin: Seed-grown (except cultivars); native to Europe

Mature Size: Medium (25-35' tall)

Description: Hedge Maple is a medium-sized tree with a slow to moderate rate of growth, with an upright form in youth becoming rounded with age. It has no serious pest or disease problems, and is tolerant to a wide range of environmental conditions. It will produce seeds. Fall color is usually yellow. Improved varieties (cultivars) include: Queen Elizabeth™, St. Gregory®
