## **State Street® Maple (*Acer miyabei*)**

**Origin:** Cultivar propagated vegetatively; species native to Japan

**Mature Size:** Medium to Large (35-45' tall)

**Description:** State Street® maple has a moderate growth rate, with an oval form in youth becoming rounded with age. It is hardy and adaptable, tolerating Michigan winters and growing well in a variety of different soil conditions (preferring well-drained soil). It has no serious disease or pest problems. Fall color is yellow. It will produce seeds. State Street® is an improved variety of miyabe maple introduced by the Chicagoland Grows® Association from a parent tree at the Morton Arboretum (IL).
