

Fifth-Twelfth Grade: Archaeology in Our Community

How does trash reveal the story of the past? Students are invited to view the Museum's archaeology site where the original Taylor log cabin was built in 1823. Students learn about basic excavation tools and techniques used in archaeological investigations. After visiting the artifact collection, the students will construct a story of pioneer life in Stony Creek Village.

Please Note: No digging by students is allowed at the archaeological site.

Information

Cost: \$3.00 per student
Free admission for adult chaperones and
educators.
