

Fifth-Twelfth Grade: Rochester in the World Scene

This presentation is a great way to demonstrate the importance of world events to local communities. *Rochester in the World Scene* allows students to discover how world, national, and state events helped shape our community and conversely how local events affected the world. Among the important events discussed in the presentation are the major wars, the Cholera Pandemic of 1832, Michigan's Lumber Industry, the Great Depression, and Salk's Polio Vaccine. This lecture is adapted for each grade level. This program can be held at the Rochester Hills Museum or in the classroom.
